

adwater® Garden Water Features

Pond Shells - adwater® pond shells can be used to create your own water feature or lily pond. They are ideal for use with **adwater waterfall rocks**, or as a larger reservoir with any of our **adwater feature sets**.

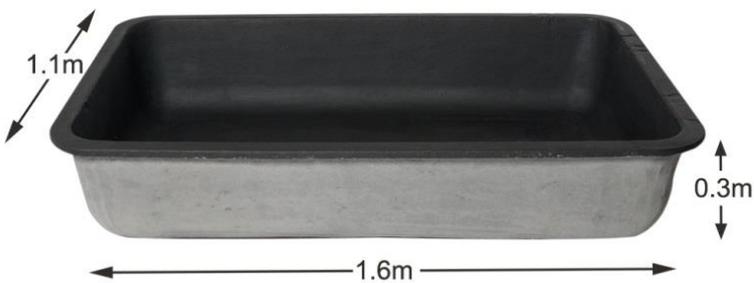

adwater pond shells are manufactured from fibre reinforced cement. They are rigid, light weight and easy to install. When situating a pond in the ground we recommend that it is bedded into 50-100mm thickness of semi dry sand and cement mixture and settled into it by filling with water, prior to the cement setting. Do not stand inside the ponds. **adwater** ponds can also be used above ground, but should be bedded in the same manner.

Pond shell AD903
Volume: 500 litres

Pond shell AD904
Volume: approx 240 litres

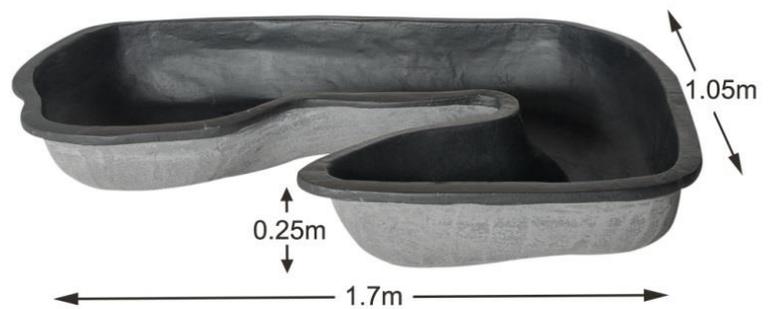

Pond shell AD905
Volume: 380 litres

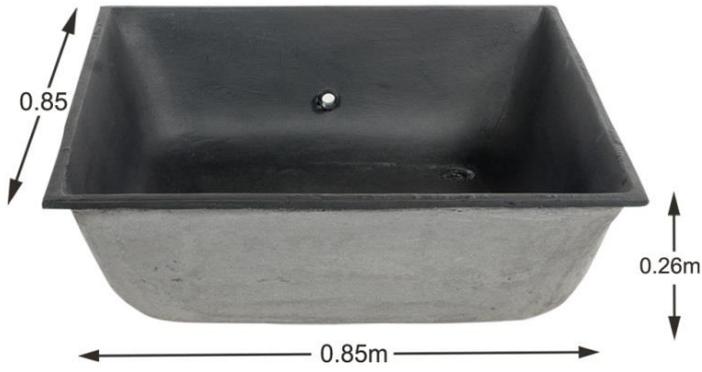

Pond shell AD906
Volume: approx 250 litres

Pond shell AD907
Volume: 400 litres

Pond shell AD908
Volume: approx 220 litres

Pond shell AD909
Volume: 133 litres

Pond shell AD910
Volume: approx 90 litres

Pond shell AD911
Volume: 44 litres

Pond shell AD914
Volume: approx 65 litres
